Risk Disclaimer

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

Please note the Fund's risk category may change in the future.

Why is the fund in the specific category?

This Fund is ranked 6. This is due to historical price movement of such investments.

The indicator does not take into account the following risks of investing in this Fund:

Market risk: The investments of the Fund are subject to normal market fluctuations and other risks inherent in investing in securities.

Diversification Risk: Some Funds may have a portfolio of assets which is concentrated in individual countries, companies or market sectors. If one of these factors underperformed, it would have a greater effect than would be the case in a more diversified portfolio where the risk is more widely spread.

Interest Rate Risk: Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.

Currency exchange rates: Currency fluctuations may adversely affect the value of a Fund's investments and, depending on an investor's currency of reference, currency fluctuations may adversely affect the value of his investment in Shares.

Counterparty risk: The Fund will be subject to the risk of the inability of any counterparty to perform with respect to transactions, whether due to insolvency, bankruptcy or other causes.

Further details on risk factors that apply to this Fund are set out in the Risk Factors section of the prospectus.
